

Public Notice to Boil Water

Due to a temporary water outage that occurred as a result of a water main repair on March 10, 2018, the Texas Commission on Environmental Quality (TCEQ) has required our water system, Maxwell Water Supply Corporation/PWS ID number 0280003 to notify customers of the need to boil their water prior to consumption. The water services affected are in the following locations(s):

- **Maxwell East of 1966**
- **In and around town of Maxwell**
- **East of Hwy 142**
- **Any other nearby location that may have lost water pressure or had NO water during this water main repair on March 10, 2018.**

To ensure destruction of all harmful bacteria and other microbes, water for drinking, cooking, and making ice should be boiled and cooled prior to use. The water should be brought to a vigorous, rolling boil and then boiled for two minutes. In lieu of boiling, you may purchase bottled water or obtain water from some other suitable source.

When it is no longer necessary to boil the water, the water system officials will notify you that the water is safe for consumption. Instructions to discontinue boiling will be issued in the same manner as this notice.

If you have questions concerning this matter, you may contact the office at 512-357-6253.
